Project Design Phase-II
Data Flow Diagram & User Stories

Date	14 October 2026
Team ID	
Project Name	Automated Network Request Management System
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

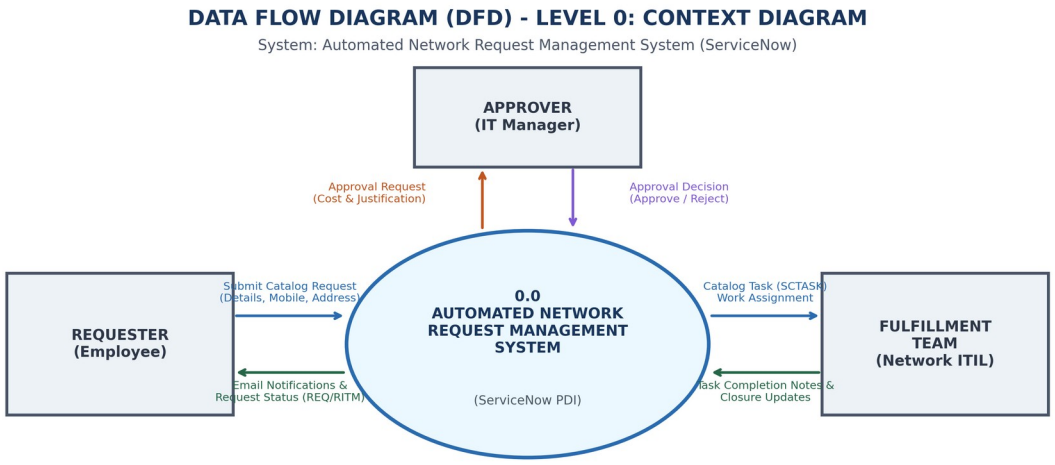

Figure 2.2: DFD Level 0 Context Diagram

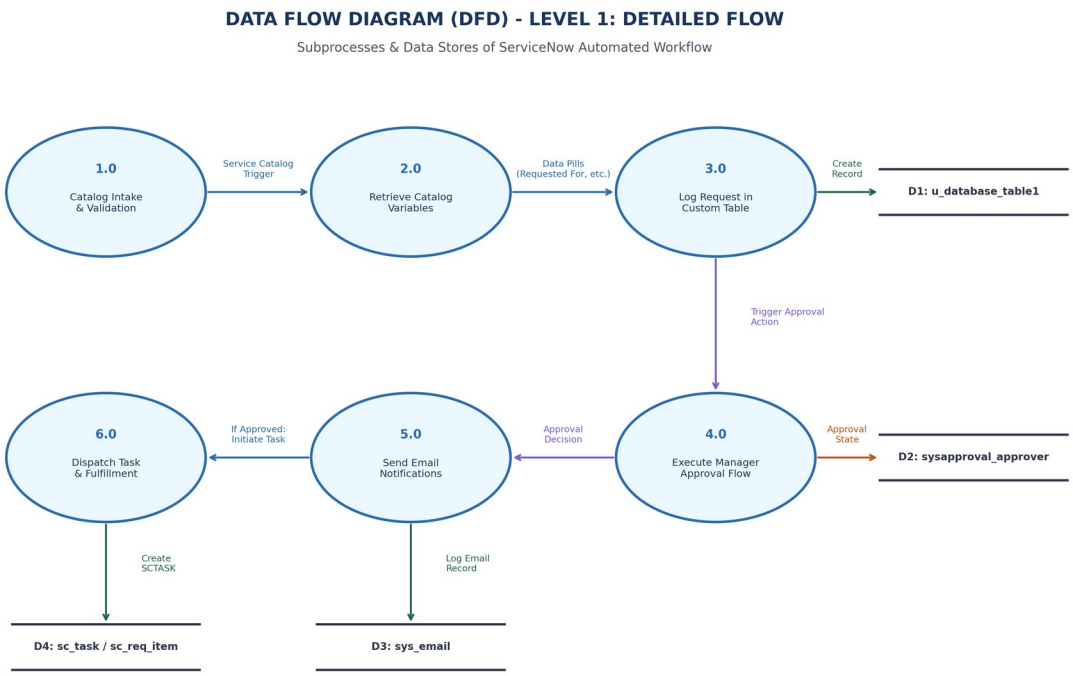

Figure 2.3: DFD Level 1 Detailed Process Decomposition

User Stories:

Use the below template to list all the user stories for the product:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Employee	Catalog Intake	USN-1	As an employee, I can select 'Network Request1' from the Service Portal.	Item accessible via /sp.	High	Sprint-1
Employee	Catalog Intake	USN-2	As an employee, I can choose Broadband, Fiber, or Wireless connection.	Choice options render cleanly.	High	Sprint-1
Employee	UI Validation	USN-3	As an employee, 'Existing ID' shows only when 'Existing' is selected.	UI policy toggles field visibility.	Medium	Sprint-1
Administrator	Data Model	USN-4	As an admin, request details persist in custom table u_database_table1.	Record created with mapped fields.	High	Sprint-1
Manager	Approval	USN-5	As a manager, I receive an actionable	sysapproval_approver row created.	High	Sprint-2

			approval record.			
Requester	Notification	USN-6	As a requester, I receive automated email on request creation and approval.	sys_email generated with REQ details.	High	Sprint-2
Engineer	Fulfillment	USN-7	As a network engineer, an assigned Catalog Task (sc_task) is generated.	Task appears in ITIL queue.	High	Sprint-2
Administrator	Workflow	USN-8	As an admin, Flow Designer updates custom record status to 'Approved'.	u_database_table1 status updated.	High	Sprint-2
Administrator	Security	USN-9	As an admin, only managers can approve requests via RBAC.	End users cannot modify approval status.	Medium	Sprint-2
Auditor	Audit Trail	USN-10	As an auditor, complete lifecycle timestamps and logs are preserved.	Full audit history visible.	Medium	Sprint-2
