Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	14 October 2026
Team ID	
Project Name	Automated Network Request Management System
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution:

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Service Catalog Intake	Provide 'Network Request1' catalog item capturing contact, connection type, amount, address.
FR-2	Dynamic Form Policy	Catalog UI Policy 'visible/hide of ID field' dynamically toggles 'Existing ID' field.
FR-3	Automated Flow Trigger	Flow Designer flow 'Network Request1' triggers on Service Catalog submission and retrieves variables.
FR-4	Custom Table Logging	Create Record action logs data pills into Database Table1 (u_database_table1) with auto-numbering.
FR-5	Automated Email Alerts	Send Email action generates HTML notification with request REQ0010005 details in sys_email.
FR-6	Approval Routing Engine	Ask for Approval action creates sysapproval_approver record assigned to System Administrator.
FR-7	Approval State Handling	If approved branch executes Update Record setting status to 'Approved' and assigns to ITIL User.
FR-8	Catalog Task Fulfillment	Create Catalog Task action generates sc_task for network engineering team provisioning.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution:

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Service Portal form renders responsively in under 2 seconds with intuitive tooltips.
NFR-2	Security	Role-Based Access Control (RBAC) restricts approval actions to authorized managers.
NFR-3	Reliability	Workflow guarantees 99.9% uptime on ServiceNow SaaS cloud platform.
NFR-4	Performance	Flow Designer actions execute in milliseconds (36ms variable retrieval, 18ms record creation).
NFR-5	Maintainability	Zero-code flow actions and reusable

		variable sets allow easy maintenance without scripting.
NFR-6	Auditability	Complete immutable audit trail preserved across sys_created_on, sys_updated_by, and sys_email.
